

Image Cleaner

For Phoenix Cart by frankl

Features:

- Checks for orphan images that are no longer attached to the database
- Checks products, product images, product description, categories and manufacturers tables
- Checks if an image exists in the database but doesn't exist on your server
- If image is missing, Image Cleaner links directly to the edit page so you can rectify the problem
- Unused images are not deleted, they are moved to the **images/unused** directory.
- You choose which files to move or keep
- Exclude image subfolders from image search
- View all images on your server and in your database

Installation:

- **BACKUP YOUR DATABASE AND FILES**
- Copy all files in the catalog directory to your Phoenix Cart server, retaining folder structure
- Go to Admin -> Tools -> Image Cleaner
- That's it! You can start using Image Cleaner
