

Special Pricing Per Customer

For Phoenix Cart by frankl

Features:

- Gives granular control over customer prices
- Individual prices for individual customers
- Set customer as eligible for individual prices or not (useful if customer normally receives individual prices but you want to either a) halt temporarily without having to delete and re-add special prices; or b) if customer is no longer eligible for individual prices but you want to keep a historical record of individual prices they were entitled to)
- Easily add, remove, and edit individual prices on the customers info edit page in admin
- Individual prices are used throughout the site for individual customer
- Includes product listing, category pages, product pages, shopping cart, and checkout
- Addons using pricing from product class will use SPPC pricing
- SPPC Report shows all customers and their special pricing
- Search SPPC Report by customer id
- Enter a search date on SPPC Report to show products not purchased after a particular date or not at all (useful for filtering out old SPPC customers)
- Click through to customer edit page to edit Separate Pricing Per Customer details for that customer
- Deleting a customer will also delete their entries in the sppc table

Installation:

- **BACKUP YOUR DATABASE AND FILES**
- Copy all files in the catalog directory to your Phoenix Cart server, retaining folder structure
- No files will be overwritten
- Search for a customer, go to the edit page, and click the blue **Special Pricing For Customer** button
- In the Add Products section enter product id and special price, then click Save
- You've created your first Special Price for that customer!
- Check the SPPC Report at Admin -> Customers -> SPPC Report
- Click on a customer row to go to customer edit page, where you can edit Separate Pricing Per Customer details.

After navigating to edit customer page, click the blue **Special Pricing For Customer** button

Ensure Customer is eligible for Special Pricing is on if you want the customer to be eligible for special individual prices.

Enter a product id in the Add Products section. Pressing tab will automatically fill product name, product regular price, and if applicable product special price.

Enter the customers special individual price in either the SPPC Price ex or SPPC Price (then pressing tab) will automatically update the other field, calculated on the product tax class id.
