

Customers Auto Login

For Phoenix Cart by frankl

Features:

- Clients can select a checkbox to remember their login on the current device for up to 2 years of inactivity.
- Login information is stored in a cookie on the client side and contains an MD5 hash created from customer information. The hash ensures high security, as it requires the same IP address to be used for validation.
- For security reasons, if the client changes their email or password, they will need to log in again on all devices.

Installation:

- **BACKUP YOUR DATABASE AND FILES**
- Copy all files in the catalog directory to your Phoenix Cart server, retaining folder structure
- Go to Admin -> Modules -> Content and disable the Sign In Form module, then click the Install new module button. Select the Customer Auto Login module and click the Install Module button.
- That's it, done!
