

Categories Extended

For Phoenix Cart by frankl

Features:

- Enable / Disable categories.
- Change sort order of categories.
- Hide or show in top header menu.
- Use different pages for different categories.
- Add an external URL for categories.
- Add a hero image to categories.
- Add overlay text on hero image in each language for your store.
- Overlay text has color and placement selections.
- Move, copy and delete products in bulk.
- Move and edit categories

Installation:

- **BACKUP YOUR DATABASE AND FILES**
- Copy all files in the catalog directory to your Phoenix Cart server, retaining folder structure
- Go to **Admin -> Catalog -> Categories Extended** to start editing categories.
- FOR HEADER MENU:
If enabled, disable **Modules -> Content -> Horizontal Menu** and enable **Modules -> Content -> Horizontal Menu for Categories Extended**.
- FOR HERO IMAGE:
Install **Modules -> Content -> Category Hero Image** and **Modules -> Content -> Hero Image**.
- FOR CATEGORY URL:
Install **Modules -> Content -> External Category URL** for index_nested and index_products.
- That's it, done!

Advanced - Optional index pages

Create new files in catalog, languages, and pages ensuring filename starts with index (i.e index_fruits.php). Page will then be available in the drop down when editing category on Categories Extended page in admin. Add the layout to the new page before using for categories.
