

Summernote Editor

By Pierre_P

No core editing

Tested on CE Phoenix v1.1.0.5

Copy all files in the catalog directory to your Phoenix Cart server, retaining folder structure

```
includes/hooks/admin/siteWide/summernote.php
```

ext/modules/summernote/summernote_upload.php

ext/modules/summernote/summernote delete.php

New images will be saved in your images directory in /images/summernote

This new images summernote directory will also be automatically created if not existing

Uses unique filenames for saved images.

Deleting images from the editor will also delete image on server.

Only jpg, png, gif, and webp images are allowed

[illegible]
