

Advanced Order Manager (AOM)

Version: V1.0

Platform: Phoenix Cart (Tested on 1.1.0.6 php 8.2)

Installation

1. Back up your Phoenix Cart files and database.
2. Extract the release archive.
3. Upload the archive contents, preserving the directory structure.(see files below)
4. Copy the contents of the AOM.css file into your catalog/templates/override/static/user.css file
5. Log into the Phoenix administration area.
6. Open the Orders menu and confirm 'Advanced Order Manager' is available.

7. **Only if using Orderlist V1:** open admin/orderlist.php. Find:

```
<td><strong><a href="orders.php?oID=' . (int)$oid . '&action=edit"
class="text-decoration-none">#'. (int)$oid . '</a></strong></td>
```

and replace with:

```
<td><strong><a href="manual_order_edit.php?oID=' . (int)$oid . '"
class="text-decoration-none">#'. (int)$oid .
'</a></strong></td>with
```
