PWA Guest Checkout

Version 4.4.0 Phoenix

by @raiwa
info@oscaddons.com
www.oscaddons.com

In memoriam and all credits to De Dokta

Thanks to: @Owl Sauron, @tsimi, @burt, @ecartz, @Mikepo, @rupruprup for ideas, suggestions, code and testing

Support: https://phoenixcart.org/forum/app.php/addons/free_addon/purchase_without_account/support

Compatibility:

Phoenix Cart 1.0.7.14.+.
Tested with Phoenix 1.0.8.0
PHP 7.0-7.4

Older Phoenix versions please use the appropriate version for your store version
Older CE BS versions please use PWA for BS 3.0.5
Older 2.3.4.(1.) versions please use PWA for BS 2.5r2

Changes Version. 4.4.0

- Added disable script to footer account module. Thanks to @plamastus for the advise
- Added delete guest account routine to logoff page. Thanks to @plamastus for the advise
- Added optional redirect to Create Account PWA to the login page. Thanks to @mikabee for the suggestion
- Updated all Copyright references to Phoenix Cart

Changes Version. 4.3.6r1

- Removed blank line at the beginning of:
`includes/modules/content/checkout_success/cm_cs_pwa_keep_account.php`. Thanks to @plamastus for the advise

Changes Version. 4.3.6

- Updated customer data module for Phoenix 1.0.7.14+ compatibility.
- modernized code to match actual core standards
- moved pwa files from default to override template

Changes Version. 4.3.5

- Updated customer data module for Phoenix 1.0.7.12+ compatibility.

Changes Version. 4.3.4

- fixed sql error in `create_account_pwa.php`. Thanks to @vmn

Changes Version. 4.3.3

- updated for Phoenix 1.0.7.9+
- modernized coding to match actual core standards
- updated reviews_pwa page to match core reviews page including nickname support.

Changes Version. 4.3.2

- fixed error in admin reviews hook. Thanks to @discxpress
 - updated version info in login module. Thanks to @discxpress
-

Changes Version. 4.3.1

- updated content modules hook check
-

Changes Version. 4.3.0

- updated for Phoenix 1.0.7.5
 - updated createaccount_pwa.php to templateable page
 - added MATC hook for create_account_pwa.php page
 - moved store hook to templates
 - updated admin/customers.php hook to customer details sql query and added support for search option
-

Changes Version. 4.2.0

- updated for Phoenix 1.0.6.0
 - renamed account_pwa.php to create_account_pwa.php
 - updated create_account.pwa.php to use customer data modules
 - flexible optional use of customer data modules in create_account.pwa.php
 - added delete guest accounts button and guest count in admin/customers.php
 - removed unnecessary guest flag in address_book table
 - all changes are hooked now, zero core modifications
 - fixed some minor errors from previous versions
-

Changes Version. 4.1.0

- hooked all modifications on admin side
 - one hook call needed to be added in admin/orders.php and checkout_process.php
-

Changes Version. 4.0.1

- updated core reference for Phoenix 1.0.4.0 in admin/reviews.php
 - replaced deprecated <u></u> tags with alert-link class in shop language files. Thanks to @Demitry
 - added sql to delete guest account data also from customers_info, customers_basket and customers_basket_attributes tables when the guest account is deleted. Thanks to @vmn
 - disable navbar account menu and header account buttons during guest checkout. Thanks to @vmn
 - updated scripts for checkout success to restyled Phoenix 1.0.2.6+ version..
-

Add-Ons Support:

[Wholesale \(SPPC lite\)](#) and [Wholesale Pro](#)

- Payment class extension includes support for wholesale payment modules exclusion. No additional mods required.

[Points and Rewards BS](#)

- If "Offer set password to guest" is enabled, a earn point info message is shown in the list of regular account advantages at checkkout success.
-

New files:

/create_account_pwa.php
 ext/modules/content/reviews/write_pwa.php
 /includes/hooks/admin/orders/oPwa.php

```

/includes/hooks/admin/customers/cPwa.php

```

Changed files:

none

NOTE: Make sure you are using the "override" template and have it selected in:

Admin : Configuration : My Store : Template Selection

Otherwise you must copy:

```

/templates/override/includes/ext/modules/content/reviews/write_pwa.php
/templates/override/includes/hooks/shop/siteWide/pwa.php
/templates/override/includes/hooks/shop/siteWide/MATCpwa.php
/templates/override/includes/hooks/write_pwa/css.php
/templates/override/includes/pages/create_account_pwa.php

```

TO:

```

/templates/YOUR SELECTED TEMPLATE/includes/ext/modules/content/reviews/write_pwa.php
/templates/YOUR SELECTED TEMPLATE/includes/hooks/shop/siteWide/pwa.php
/templates/YOUR SELECTED TEMPLATE/includes/hooks/shop/siteWide/MATCpwa.php
/templates/YOUR SELECTED TEMPLATE/includes/hooks/write_pwa/css.php
/templates/YOUR SELECTED TEMPLATE/includes/pages/create_account_pwa.php

```

NOTE:

All language definitions for the public store side and not included in the 2 content modules, are included in:

```
/includes/languages/[your language]/hooks/shop/siteWide/pwa.php
```

All language definitions for the admin side are included in:

```
/includes/languages/[your language]/hooks/admin/siteWide/swPwa.php
```

```
=====
=
```

Installation

1. Copy/upload all new files into your store directory:

Phoenix_1.0.7.14+/catalog/

<=====>

Instructions

NOTE: In a normal checkout process, guest accounts are automatic deleted in the checkout success page. It may happen that a guest doesn't return to this page for example coming back from an external payment service or if he does not complete the order after he already filled in his guest data. Only in these cases a guest account may stay registered in the database and you can keep your database clean deleting old guest accounts from time to time.

3. [Required] In Admin => Modules => Content[login] install and configure the module 'Login without Account Form'.

4. [Required] In Admin => Modules => Customer Data install and configure the module 'Guest'.

5. [Required] In Admin => Modules => Customer Data for all Modules you wish to show on the create_account_pwa page, tick the page 'create_account_pwa' in the 'Pages' list. Only the E-Mail module is required for PWA to work. However you need to add the page also to the required modules for your shipping and payment modules and checkout process to work properly.

6. [Optional] If you wish to use the "Offer set password to guest" option and offer to opt for a regular account:

In Admin => Modules => Content[checkout_success] install and configure the module 'PWA Keep Account'.

7. [Required] If you are using the Date of Birth module, you need to activate the datepicker on the create_account_pwa page, go to Admin -> Modules -> Header Tags, choose the entry Datepicker JQuery and click Edit. In the file list choose create_account_pwa.php and click Save.

8a. [Optional] If you wish to use the "Review Link" options in the order confirmation mail and/or status update mail:

In Admin => Configuration => E-Mail Options => Use MIME HTML When Sending Emails => Set to "True"

8b. [Optional] In Admin => Orders => Use "Add links to product reviews" to add them to the comments.

Works for guest orders and regular orders and will be shown in the comment area if added.

9. [Optional] settings for stores selling virtual-downloadable products:

In Admin => Modules => Content[login] 'Login without Account Form'.

Allow guest checkout for virtual products =>

False: for any order containing virtual products, guest checkout will be disabled

True: for any order containing virtual products, guest checkout will be enabled

Guests Exclude Download Payment Modules

Allows to select payment modules like cod, check/money order, bank transfer etc. which are not instant to

be disabled for any virtual product order for guests.

Needs the previous option "Allow guest checkout for virtual products" to be set to "True"

NOTE: If you add a new payment module, uninstall the 'Login without Account Form' module and reinstall to update the payment module listing.

10. [Optional] settings to add review links to guest and regular order confirmation e-mails:

In Admin =>Modules => Content[login] 'Login without Account Form'.

Add Review Links to Guest Order Mail

True

Add Review Links to Standard Order Mail

True

=====

Ready! You can now use PWA!

NOTE: The PWA login form is for customers visible only if their shopping cart is not empty and they are not logged into their regular account!
