Hide Boxes on Mobile

Version 1.1 by raiwa - Copyright (c) Rainer Schmied - info@oscaddons.com - www.oscaddons.com

Pro version available:

[Hide Modules on different viewports](#)

The Hide Modules App allows to add Bootstrap Responsive Display Utility Classes (and any other class) to the Side Column Boxes, Navbar, Header, Footer and Footer Extra modules. You can control for each module if it will be shown for each device size.

Hide Boxes on Mobile

Version 1.1 Phoenix

Compatibility:

CE Phoenix 1.0.5.4+
Tested with Phoenix 1.0.8.4
PHP: 7.0 - 7.4

=====

What's this?

This module allows to add Bootstrap Responsive Display Utility Classes to the Side Column Boxes. You can tick any installed box to hide it on small devices.

Note:

If you wish to use it with third party modules, make sure the template file includes the module name as main class like the core modules:

Examples:

filename => class name:

bm_whats_new.php => bm-whats-new

cm_header_search.php => cm-header-search

Installation:

0a.) Backup your files

0b.) Backup your database

1. Upload all files included in the "uploads" directory maintaining their directory structure.

All files are new and save to upload, they will not overwrite any existing files.

2. Go to your Admin and install and configure your Hide Boxes Header Tag Module.

Admin : Header Tags : Hide boxes

Enjoy!!
