Wholesale Lite Version 4.6.0

Compatibility:

Phoenix 1.0.8.6.

Tested with Phoenix 1.0.8.6

PHP 7.0-7.4

Older Phoenix 1.0.8.0 version please use Wholesale (SPPC lite) 4.5.0.
Older Phoenix 1.0.7.12 version please use Wholesale (SPPC lite) 4.4.0.
Older Phoenix 1.0.7.8 - 1.0.7.11 versions please use Wholesale (SPPC lite) 4.3.1.
Older Phoenix 1.0.6.x - 1.0.7.7 versions please use Wholesale (SPPC lite) 4.2.0.
Older Phoenix 1.0.5.x versions please use Wholesale (SPPC lite) 4.1.1.
Older Phoenix 1.0.3.0 - 1.0.4.x versions please use Wholesale (SPPC lite) 4.1.0.
Older Phoenix 1.0.1.0 - 1.0.2.x versions please use Wholesale (SPPC lite) 4.0.1.
Older 2.3.4.(1.) BS3 based reponsive versions please use Wholesale (SPPC lite) 3.0.4
Older 2.3.4.(1.) versions please use Wholesale (SPPC lite) 2.0r1

Features:

- Possibility to assign customers to the wholesaler group
- Define individual wholesale prices to each product
- Optional tax exempt wholesalers
- Optional define individual wholesale prices to attributes
- Optional define global wholesale percentage discount to all products and attribute prices
The global wholesale discount will not apply to products and attributes which have individual wholesale prices defined
- Optional setting to apply special price instead of wholesale price if the special price is lower than the wholesale price or discount.
- Optional payment and shipping modules Exclusion lists for Wholesalers and Retailers.
- Header text module to show different info text for guests, retailers and wholesalers. The texts are

editable for each store language in the module settings.

By default:

Guests: no text

Retailers: "Welcome to your Retailer Account.
Please Contact Us to apply for a Wholesaler Account. See Conditions."

Wholesalers: "Welcome to your Wholesaler Account.
You can see your Wholesaler Prices on the Product Page and they will apply when you add the products of your choice to the Shopping Cart."

- No core file modifications
- The wholesale prices will be automatic applied when adding a product to the Shopping Cart. This is done via shopping cart class extension, no file modification needed.
- All database modifications and language definitions are integrated in the modules.
- Optional database columns removal to keep existing entances when removing the module

NOTE: If you need more than one wholesaler group or global discounts per price break, please upgrade to Wholesale PRO:

<http://www.oscaddons.com/en/commercial-add-ons/wholesale-pro-p-45.html>

Thanks

- To @ecartz for the help and guidance of the 4.2.0 update for Phoenix 1.0.6.1+
- To @heatherbell for v.4.1.0 hook testing
- To @greasemonkey for the initial idea, support, comments and testing
- To @burt for the initial guideline exposed in the forum and his database installation-removing code examples used in the store module
- To @wHiTeHaT for his help with the shopping cart class extension
- To @Tsimi, @gergely, @John W and @14steve14 for their support, comments and testing

Support forum:

<http://forums.oscommerce.com/topic/408649-wholesale-sppc-lite/>

Change log:

Version 4.6.0:

- Update for Phoenix 1.0.8.6
- Moved all wholesale template files from "wholesale" to "override" template
- Fixed undefined error in customer data module
- Fixed deprecated error in includes/hooks/admin/siteWide/wholeSalePr.php
- Updated "admin/categories" to "admin/catalog" hook

Version 4.5.0:

- Update for Phoenix 1.0.7.14
- Modernized coding to match actual core standards

- Fixed notice errors in Admin : Categories/Products => New Product Thanks to @Nige-A
- Fixed error for tax exempt wholesaler feature. Thanks to @tcdeveer3

Version 4.3.0.:

- Update for Phoenix 1.0.7.9+
- deprecated all alternative box and content modules (except product info options attributes module)
- using template for box and content modules
- added language definitions used in product info price module to store module
- added reviews box template
- added pi module

Version 4.2.0.:

- Update for Phoenix 1.0.6.0 - 1.0.7.1,
- Updated store module: changes of payment and shipping modules are now dynamically updated. No need to uninstall and reinstall the store module.
- Update for customer data modules
- Added customer data module to show customer group in customer account
- Moved payment and shipping class mod to class override
- Modularized and hooked all admin modifications

Version 4.1.1.:

- Update for Phoenix 1.0.2.x, hooked admin/categories.php. Thanks to @heatherbell for testing

Version 4.0.1.:

- Added missing modified file advanced_search_result.php. Thanks to @Portman

Version 4.0.0.:

- Update for Phoenix 1.0.1.x

Version 3.0.3.:

- Fixed compatibility with some third party payment modules

Version 3.0.1.:

- Fixed wrong language constants in:
/includes/languages/espanol/modules/content/product_info/cm_pi_options_attributes_ws.php
/includes/languages/german/modules/content/product_info/cm_pi_options_attributes_ws.php
Thanks to @Owl Sauron

Version 3.0:

- Updated for 2.3.4.1 BS CE Frozen
- Added support for PWA Guest checkout, hide retailer message for guests during checkout.

Version 2.0:

- Added possibility to show wholesale prices on all listings, boxes, modules, etc.
- Updated for latest 2.3.4 BS EDGE version, hardcoded paths
- Fix for correct calculation of negative attribute prices
- Screenshots included

Version 1.5:

- Global variable "\$wholesale_group" added to store wholesale module. Thanks to @Moxamint for the suggestion

Installation Overview

The installation instructions are splitted into a first, mandatory section and several optional sections which only need to be done if you wish to use these additional features. They are independent from each other.

A. Mandatory base installation:

Features:

- Define global wholesale percentatge discounts for all. Based on unlimited product price breaks (product price ranges)
- Optional Tax exempt wholesale customers
- Control special-wholesale prices
- Apply wholesale prices in shopping-cart, checkout confirmation and order

Optional Sections:

B. Individual wholesale product prices

Features:

Define individual wholesale prices for each product

C. Individual wholesale product attribute prices

Features:

- Define individual wholesale attribute prices for each attribute

D. Wholesale Header Module

Features:

- Show 3 different messages in the header area for guests, logged in retail customers and logged in wholesale customers. Editable for each store language.

E. Wholesale Product Info price template file

Features:

- Show wholesale price below normal price on the Product Page.

F. Wholesale Attribute Price

Features:

- Show wholesale attribute prices in the Attributes drop down menu on the Product Page

G. Wholesale Prices in product listing modules and boxes

Features:

- Show wholesale prices in the product listing used on the categories page, new products and specials page.
- Show wholesale prices in the new products module on the home page
- Show wholesale prices in new products and special box
- Show wholesale prices in third party add-on pages, modules or boxes

H. Exclude shipping modules for retailers/wholesalers

Features:

- Select shipping modules which will not show/be available for retailers or wholesalers

I. Exclude payment modules for retailers/wholesalers

Features:

- Select payment modules which will not show/be available for retailers or wholesalers

J. Tax exempt wholesalers

Features:

- Show and apply all prices without tax to wholesalers

Installation

NOTE: The next Phoenix versions will introduce more modules/boxes using the new product class. If your store version is higher than Phoenix 1.0.7.12, check your store for modules which have no more template files. If for example the template of the content module:

includes/modules/content/index_products/templates/tpl_cm_ip_product_listing.php

has been removed/doesn't exist, you should also remove the wholesale template file:

templates/wholesale/includes/modules/content/index_products/tpl_cm_ip_product_listing.php

0a.) Backup your files

0b.) Backup your database

1.) Upload all new files included in the following folders:

New files

[catalog]/templates/w_holesale/includes/modules/content/product_info/tpl_cm_pi_price.php
[catalog]/templates/w_holesale/includes/template.php
```

Modified files:

None

Support for custom modifications:

If you need it to distinguish between wholesaler and retailer for other uses, you can code it like this:

```
// wholesale BEGIN
    if ( !empty($_SESSION['wholesale_group']) && $_SESSION['wholesale_group'] >
'0' ) {
        echo 'wholesaler'; // wholesalers code
    } else { // default
        echo 'retailer'; // retailer code
    }
// wholesale END
```

If you need to add support for wholesale pro to any third party addon/module, use the following function to get the wholesale prices

(see examples in the WS content modules):

```
wholesale_price($variable_holding_product_information['products_id'])
```

Setup - How it works:

A. Mandatory base installation:

Make sure your selected store template is "override": Admin : Configuration : My Store : Template Selection : override

Note: If you are using another template directory/name, copy all wholesale files to your selected/used directory instead of the "override" directory.

Install Store Module in admin => Modules => Store => Wholesale

Apply Global Wholesale Price Discounts to all products and attribute prices:

In admin => Modules => Store => Wholesale => Edit => click edit => **Global Wholesale Discount** => save

Global Wholesale percentage Discount for all product and attribute prices with individual Wholesale Price zero. Disabled with zero amount.

Install Customer Data Module in admin => Modules => Customer Data => Wholesale
 The Company module is also required in this section.
 Customer Wholesale selection menu is shown in Company section.

Additional settings:

In admin => Modules => Store => Wholesale => Edit => click edit => **Uninstall Removes Database entries => Default: false**

Set this to true only if you wish to definitely uninstall the Wholesale Add-On and you are sure that you will not use it again. All wholesale database entries will be removed.

In admin => Modules => Store => Wholesale => Edit => click edit => **Tax Exempt Wholesalers=> Default: true**

Set to true will remove tax for wholesalers (all groups)

In admin => Modules => Store => Wholesale => Edit => click edit => **Use Special Price => Default: true**
 If set to true, special Price will be used if less than wholesale price.

B. Individual wholesale product prices

Apply Individual Wholesale Price to products:

In admin => Catalog => Categories / Products => select product=> click edit => Wholesale Price (Net) X: (Net or Gross): => fill in your wholesale prices => save

Individual Wholesale Product Prices for Wholesalers can be used.

If a wholesale product price is used, the Global wholesale percentatge discount is overwritten. Leave the product wholesale price set to 0 (zero) to apply the global wholesale percentatge discount.

Additional Settings:

In admin => Modules => Store => Wholesale:

Wholesale Price (Net) ENGLISH: Language definition used in Admin : Categories / Products page

Wholesale Price (Gross) ENGLISH: Language definition used in Admin : Categories / Products page

Wholesaler ENGLISH: Language definition used in Admin : Customers page

Retail Price Product info ENGLISH: Language definition used in the Price Module on the Product Info page

Wholesale Price Product info ENGLISH: Language definition used in the Price Module on the Product Info page

Wholesale Price Short ENGLISH: Language definition used for Wholesale Price Prefix in Store

C. Individual wholesale product attribute prices

Apply Individual Wholesale Price to products attributes:

In admin => Catalog => Products Attributes => Products Attributes (third table) => define Wholesale attribute price

NOTE: Although you do not use the modifications of this section to apply individual attribute wholesale prices and show them in the attribute menu on the product page, all global wholesale percentatge discounts will apply on attribute prices. They will only show then in the shopping cart, checkout confirmation page and orders.

Additional Settings:

In admin => Modules => Store => Wholesale:

Wholesale Price ENGLISH: Language definition used in Admin products Attributes page and public store Product Info page (Product Attributes drop down menu).

D. Wholesale Header Module

Show 3 different messages in the header area for guests, logged in retail customers and logged in wholesale customers

Install Header Module in admin => Catalog => Modules => Content [header] => Wholesale:

Pages: tick the pages where you wish to show the messages

Content Width: Select the width of the module

Message texts are defined in the language files:

includes/languages/[your_language]/modules/content/header/cm_header_wholesale.php

MODULE_CONTENT_HEADER_WHOLESALE_GUEST_TEXT: Fill in the text to show for guests in each

store language. Default: empty (no message)

MODULE_CONTENT_HEADER_WHOLESALE_RTCUSTOMER_TEXT: Fill in the text to show for logged in retailers in each store language.

Default: Welcome to your Retailer Account.
Please Contact Us to apply for a Wholesaler Account. See Conditions.

MODULE_CONTENT_HEADER_WHOLESALE_WSCUSTOMER_TEXT: Fill in the text to show for logged in wholesalers (all groups) in each store language.

Default: Welcome to your Wholesaler Account.
You can see your Wholesaler Prices on the Product Page and they will apply when you add the products of your choice to the Shopping Cart.

NOTE: If you leave any Text empty, the message block will not show up. (Like the Guest text by default)

E. Wholesale Product Info Module

Show the wholesale price on the product page below the normal price

Using the Wholesale template allows to show the wholesale price on the product page without the need to apply any changes in the core Product info price module.

F. Wholesale Attribute Price

Show the wholesale attribute price in the attribute drop down menu on the product page.

Install Product Info Module in admin => Catalog => Modules => Content [product_info] => Wholesale Options & Attributes

OR

Install Pi Module in admin => Catalog => Layout Modules => Product Info => Wholesale Options & Attributes

Example: Shiny Red Apples: 24 (Wholesale Price +5\$)

G. Wholesale Prices in product listing modules and boxes

Using the Wholesale template allows to show the wholesale price on all pages, modules and boxes, wholesale prices will show to logged in customers instead of normal prices.

Wholesale prices are preceded by prefix. Default ENGLISH: WP. Can be left empty.

Additional Settings:

In admin => Modules => Store => Wholesale:

Wholesale Price Short ENGLISH: Language definition used for Wholesale Price Prefix in Store

H. Exclude shipping modules for retailers/wholesalers

It is possible to hide/disable shipping modules for retailers and wholesalers.

In admin => Modules => Store => Wholesale:

Wholesaler Exclude Shipping Modules => select the shipping modules you wish to hide/disable for wholesalers (all groups)

Retailer Exclude Shipping Modules => select the shipping modules you wish to hide/disable for retailers

NOTE: If you add any new shipping module, uninstall the store module and reinstall again to show the new shipping module in the list. Configuration settings must be entered again.

I. Exclude payment modules for retailers/wholesalers

It is possible to hide/disable payment modules for retailers and wholesalers.

In admin => Modules => Store => Wholesale:

Wholesaler Exclude Payment Modules => select the payment modules you wish to hide/disable for wholesalers (all groups)

Retailer Exclude Payment Modules => select the payment modules you wish to hide/disable for retailers

NOTE: If you add any new payment module, uninstall the store module and reinstall again to show the new payment module in the list. Configuration settings must be entered again.

NOTE: Language definitions are pre-defined for English, German, and Spanish. For all other languages English will be filled in by default.
Please translate to your store languages.

Wholesale Lite Version 4.6.0

Compatibility:

Phoenix 1.0.8.6+

Tested with Phoenix 1.0.8.6

PHP 7.0-7.4

Older Phoenix 1.0.8.0 version please use Wholesale (SPPC lite) 4.5.0.
Older Phoenix 1.0.7.12 version please use Wholesale (SPPC lite) 4.4.0.
Older Phoenix 1.0.7.8 - 1.0.7.11 versions please use Wholesale (SPPC lite) 4.3.1.
Older Phoenix 1.0.6.x - 1.0.7.7 versions please use Wholesale (SPPC lite) 4.2.0.
Older Phoenix 1.0.5.x versions please use Wholesale (SPPC lite) 4.1.1.
Older Phoenix 1.0.3.0 - 1.0.4.x versions please use Wholesale (SPPC lite) 4.1.0.
Older Phoenix 1.0.1.0 - 1.0.2.x versions please use Wholesale (SPPC lite) 4.0.1.
Older 2.3.4.(1.) BS3 based reponsive versions please use Wholesale (SPPC lite) 3.0.4
Older 2.3.4.(1.) versions please use Wholesale (SPPC lite) 2.0r1

Support forum:

<http://forums.oscommerce.com/topic/408649-wholesale-sppc-lite/>

Update to version 4.6.0.

NOTE: The next Phoenix versions will introduce more modules/boxes using the new product class. If your store version is higher than Phoenix 1.0.8.6, check your store for modules which have no more template files. If for example the template of the content module:

includes/modules/content/index_products/templates/tpl_cm_ip_product_listing.php

has been removed/doesn't exist, you should also remove the wholesale template file:

templates/wholesale/includes/modules/content/index_products/tpl_cm_ip_product_listing.php

Your store must be Phoenix 1.0.8.6+

0a.) Backup your store files

0b.) Backup your database

1. Uninstall Store Module in admin => Modules => Store => Wholesale

- leave the setting "Uninstall Removes Database entries" set to "false"

- take note of your settings

2. Switch your store template to override: Admin : Configuration : My Store : Template Selection : override

Note: If you are using any other template directory/name, copy all wholesale files to your selected/used directory instead of the "override" directory.

3 Upload and replace:

[catalog]/includes/hooks/admin/catalog/w holeSaleLite.php

[catalog]/includes/hooks/admin/siteWide/w holeSale.php

[catalog]/includes/languages/english/system/override/w wholesale\product.php

[catalog]/includes/languages/espanol/system/override/w wholesale\product.php

[catalog]/includes/languages/german/system/override/w wholesale\product.php

[catalog]/includes/modules/customer_data/cd_w wholesale.php

[catalog]/includes/modules/customer_data/cd_w wholesale_account.php

[catalog]/includes/system/override/w wholesale/product.php

[catalog]/includes/system/override/w wholesale/shipping.php

[catalog]/templates/override/includes/hooks/shop/siteWide/styleSheets.php

[catalog]/templates/override/includes/hooks/shop/siteWide/w wholesaleLite.php

[catalog]/templates/override/includes/modules/content/product_info/tpl_cm_pi_price.php

4. Delete (files and "categories" and "wholesale" directories) :

[catalog]/includes/hooks/admin/categories/w holeSalePro.php

[catalog]/templates/w wholesale/[all_content]

5. Install Store Module in admin => Modules => Store => Wholesale

- adjust the settings to your noted previous settings

Any donation is very appreciated, it allows developing more free add-ons for you.
